RxART celebrated the installation by Nina Chanel Abney in the Pediatric Ambulatory Clinic at NYC Health + Hospitals/Elmhurst on Friday, Nov. 18.

Abney's installation features a world of brightly colored, happy characters to provide a positive distraction for patients and families.

"We are tremendously proud to have had the opportunity to work with Nina Chanel Abney, an extraordinary talented and generous artist, on such an important project," said Diane Brown, RxART's Founder and President. "It has been a privilege to see this joyful installation come to life for the patients, families and dedicated staff at Elmhurst Hospital."
